

Akash Uddhav Sonar

Chhatrapati Sambhajanagar, Maharashtra, India | akashsonar.9113@gmail.com | 8855049725

Portfolio: akashsh.vercel.app | linkedin.com/in/sonar-akash | github.com/SonarAkash | leetcode.com/Akash_Sonar

Summary

Backend-focused Software Engineer with experience building scalable, production-grade systems using **Java (Spring Boot)** and **Node.js**. Skilled in designing secure **REST** and **GraphQL APIs**, optimizing database performance using **PostgreSQL (Full-Text Search, indexing)**. Hands-on experience working with **Docker** and deploying applications on **Google Cloud Platform (Compute Engine)**. Proven ability to improve system performance and reliability through real-world backend problem solving, with a strong foundation in data structures (**1600+ LeetCode rating**).

Experience

Software Engineering Intern

Joylane

Nashik, India

Jan 2026 – Present

- Implemented **deep linking workflows** and Android App Links, enabling seamless navigation from shared URLs directly to in-app content.
- Built a **Redis-based session feed randomization system** to improve content diversity and ensure duplicate-free pagination.
- Developed **multipart chunk-based video uploads** with asynchronous processing, improving reliability under unstable network conditions.
- Developed **admin tools** and **feature toggles**, enabling controlled feature rollouts and improving operational flexibility.
- Tech Stack:** Node.js, TypeScript, GraphQL, PostgreSQL, Redis, React Native

Projects

Log Management and Analysis Platform

GitHub

July 2025 – September 2025

- Built a scalable backend system for real-time log ingestion, processing, and querying of continuous log streams.
- Designed secure RESTful APIs using **Spring Boot**, **Spring Security**, and **JWT** for multi-tenant log access.
- Implemented **PostgreSQL Full-Text Search (FTS)** with **GIN indexing**, enabling fast semantic search and multi-attribute filtering.
- Benchmarked FTS against LIKE queries using **EXPLAIN ANALYZE**, achieving up to **10–12× faster** query performance.
- Deployed on **Google Cloud Platform (Compute Engine)** with containerized services using **Docker**.
- Tech Stack:** Java, Spring Boot, Spring Security, JWT, PostgreSQL (Full-Text Search, GIN Indexing), Docker, Google Cloud Platform

FreeFlow – Peer-to-Peer Communication Platform

GitHub

Oct 2024 – Nov 2024

- Built a real-time peer-to-peer communication platform enabling seamless video, audio, and data sharing using WebRTC.
- Engineered the **Signaling Server** using Spring Boot and WebSockets to handle peer discovery and WebRTC connection handshakes.
- Implemented robust networking logic to establish stable P2P connections, ensuring low-latency and reliable communication between users.
- Tech Stack:** Java, Spring Boot, WebRTC, WebSockets

Technical Skills

Languages: Java, JavaScript, TypeScript

Backend Technologies: Spring Boot, Node.js, Hibernate, GraphQL, RESTful APIs, WebSockets

Frontend Technologies: React.js, React Native, HTML, CSS

Databases: PostgreSQL, MySQL, MongoDB

Security: Spring Security, JWT (JSON Web Tokens)

Tools & Deployment: Git/GitHub, Docker (containerization), Linux/Unix, Google Cloud Platform (Compute Engine)

Education

Deogiri Institute of Engineering and Management Studies

Bachelor of Technology in Computer Science and Engineering

Chhatrapati Sambhajanagar, Maharashtra

Expected May 2026

- Current CGPA: 6.8/10.0

Professional Involvement

Technical Lead, Coding Ninjas Campus Club

Deogiri Institute of Engineering and Management Studies

April 2024 – August 2024

Chhatrapati Sambhajanagar, Maharashtra

- Mentored students in DSA, promoting consistent problem-solving habits.
- Organized coding contests and workshops to boost hands-on learning.
- Advocated the use of the Coding Ninjas platform for structured DSA practice.

Achievements

Codeathon (2nd Place, MGM University)

LeetCode Rating: 1600+

Solved 1000+ DSA Problems
