

Akash Uddhav Sonar

Chhatrapati Sambhajnagar, Maharashtra, India | akashsonar.9113@gmail.com | 8855049725

Portfolio: akashsh.vercel.app | linkedin.com/in/sonar-akash | github.com/SonarAkash | leetcode.com/Akash_Sonar

Summary

Backend-focused Software Engineer with hands-on experience building and deploying production-ready services using **Java**, **Spring Boot**, and **Node.js**. Skilled in designing secure and scalable **REST** and **GraphQL APIs**, working with **PostgreSQL**, and containerizing applications with **Docker**. Experienced in deploying applications on **Google Cloud Platform (Compute Engine Linux VMs)**. Strong problem-solving background with a **1600 LeetCode rating** and a focus on clean, maintainable backend systems.

Experience

Software Engineering Intern

Joylane

Nashik, India

Jan 2026 – Present

- Working closely with senior engineers and the founding team to implement backend and admin-facing features in a production startup environment.
- Developing and maintaining APIs using **Node.js**, **TypeScript**, and **GraphQL**, with data stored in **PostgreSQL**.
- Implementing feature enhancements such as follow systems and admin panel fixes, and resolving backend and UI bugs to improve platform stability.
- Collaborating with frontend teams using **React Native** to ensure smooth API integration and end-to-end feature delivery.

Projects

Log Management and Analysis Platform

GitHub | Live

July 2025 – September 2025

- Independently built a backend system for real-time log ingestion, processing, and analysis, designed to handle continuous log streams.
- Designed and secured RESTful APIs using **Spring Boot**, **Spring Security**, and **JWT** for authenticated log querying.
- Implemented **PostgreSQL full-text search (FTS)** to enable efficient log indexing and advanced multi-filter search.
- Deployed the application on **Google Cloud Platform** using a **Compute Engine Linux VM**, with services containerized using **Docker**.
- Tech Stack:** Java, Spring Boot, Spring Security, JWT, PostgreSQL, Docker, Google Cloud Platform

FreeFlow – Peer-to-Peer Communication Platform

GitHub | Live

Oct 2024 – Nov 2024

- Built a real-time peer-to-peer communication platform enabling seamless video, audio, and data sharing using WebRTC.
- Engineered the **Signaling Server** using Spring Boot and WebSockets to handle peer discovery and WebRTC connection handshakes.
- Implemented robust networking logic to establish stable P2P connections, ensuring low-latency and reliable communication between users.
- Tech Stack:** Java, Spring Boot, WebRTC, WebSockets

Technical Skills

Languages: Typescript, JavaScript, Java, Python, Bash (Shell Scripting)

Frontend Technologies: React.js, React Native, HTML, CSS

Backend Technologies: Spring Boot, Hibernate, GraphQL, RESTful APIs, WebSockets, Express.js, Node.js

Security: Spring Security, JWT (JSON Web Tokens)

Databases: PostgreSQL, MySQL, MongoDB

Tools & Deployment: Git/GitHub, Docker, Linux/Unix, Google Cloud Platform (Compute Engine)

Education

Deogiri Institute of Engineering and Management Studies

Bachelor of Technology in Computer Science and Engineering

- Current CGPA: 7.0/10.0

Chhatrapati Sambhajnagar, Maharashtra

Expected May 2026

Professional Involvement

Technical Lead, Coding Ninjas Campus Club

Deogiri Institute of Engineering and Management Studies

April 2024 – August 2024

Chhatrapati Sambhajnagar, Maharashtra

- Mentored students in DSA, promoting consistent problem-solving habits.
- Organized coding contests and workshops to boost hands-on learning.
- Advocated the use of the Coding Ninjas platform for structured DSA practice.

Achievements

Codeathon (2nd Place, MGM University) | LeetCode Rating: 1600+ | Spring Boot (Udemy), Java & DSA (Apna College)
